

## **RESOLUTION**

Of the II Conference of Women's sections at metalworkers' unions in SEE

The representatives of Women's sections at metalworkers' unions from SEE met at the II Regional Conference in Sarajevo on May 30<sup>th</sup> 2011.

In this occasion all participants pointed out that the activities of women in unions are necessary and precious, however, there are still problems that engrave higher presence of women in union bodies, as well as broader activities or even establishing women's section in our organizations.

There is strong dedication to strengthening the capacities of women's sections, which contribute to strengthening the capacities of union itself, and their broader activities, particularly through exchange of experiences, mutual cooperation and assistance.

With regard to this, the present representatives of women's sections express readiness to establish **Network of Metalworkers' Women Sections in SEE** and to work on developing mutual cooperation, conducting mutual projects and activities.

With this resolution all representatives of women's sections are obliged with commitment to take part in establishing the Network of Metalworkers' Women Sections in SEE and to organize women's sections in their organizations. For the purpose of Network establishment, regardless whether there is women's section or it is in preparation, all unions are obliged to submit one woman-representative's name for further communication within one month from bringing this Resolution. The data are to be submitted to **Mare Anceva**, SIER, Regional Coordinator of the current project, and she is committed to bring the Network to operational stage.
